LC72 Laundry Cart - Product Info Sheet

Reinforced Interlocking Poly Base
The cart body and base are designed with interlocking ribs and a molded impact lip. The ribs lock the base and body together to distribute load, while the protective lip transfers caster impacts into the cart body instead of the mounting bolts—creating a stronger, more impact-resistant structure.

Overview: Our LC72 Laundry Cart is thoughtfully engineered for ease of use, strength, and long-lasting reliability. At Polycarts, we are committed to providing robust, ergonomic solutions that meet the demanding needs of laundry operations while remaining cost-effective. With many products available in today's market, our mission is simple: deliver exceptional quality, durability, and performance—without breaking the bank.

Benefits: The LC72 Laundry Cart is engineered for industrial performance and operational efficiency. Its rotationally molded high-density polyethylene (HDPE) body with a durable poly base delivers a lightweight yet exceptionally strong solution. A molded structural lip and interlocking ribs distribute horizontal caster impacts throughout the cart rather than concentrating stress on bolt connections, improving durability under heavy use. Six-inch casters provide smooth, controlled maneuverability, while the seamless interior eliminates exposed metal surfaces and hardware to prevent snags and tearing. The metal-free interior design also helps eliminate rust and corrosion risks, protecting linens and extending the cart's service life.

Standard Features:

- **Rotationally molded with chemical resistant, and waterproof High-Density polyethylene (HDPE)**
- **Metal Free interior**
- **6"X2" non-marking hard rubber casters. 2 rigid, 2 swivel**
- **Hand Holes**
- **Drain Holes**
- **Integrated Impact Lip**
- **Reinforced Interlocking Poly Base**

Featured Options:

- **Stencil or mold on logos, graphics, or text**
- **Castor configurations (4 swivel option)**
- **Customizations**
