

BT Bushel Cart Series - Product Info Sheet

3-D cross section
of our engineered
lip for durability
and comfort

Overview: Our multi-purpose BT Bushel Cart Series is engineered for ease and reliability. We offer a robust, ergonomic and reliable solution for a myriad of trades. Including: hotels, hospitals, laundry, industrial facilities, health clubs, aquatic facilities and food services.

Benefits: The BT Bushel Cart Series is purpose-built for industrial performance and operational efficiency. Constructed with a fully sealed top lip, the carts provide enhanced structural integrity while reducing the risk of cracking under heavy use. The rotationally molded body, combined with a galvanized steel bottom, delivers a lightweight yet highly durable solution. Four-inch casters ensure smooth, precise maneuverability, while the thoughtfully engineered nesting design allows carts to stack securely for space-saving storage and separate easily without sticking or requiring extra force.

Standard Features:

- Rotationally molded with chemical resistant, and waterproof High-Density polyethylene (HDPE)
- Comfortable and durable rounded top that is fully sealed and impact resistant
- 4" non-marking hard rubber casters
- Galvanized steel metal base, flat (BT12, BT16); pan base (BT20)
- Designed to easily nest without wedging for easy unstacking

Featured Options:

- Upgrade to 6" castors on BT 20 Bushel
- Stencil or mold on logos, graphics, or text
- Customizations
